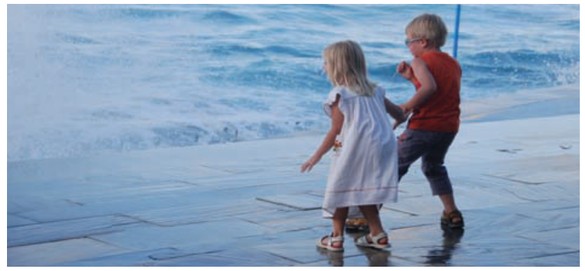
Arabian Profile

Self Contained Beach/Park Facilities

Arabian Profile Co. Ltd was founded in 1985 and in the years since has built a solid reputation for quality, craftsmanship and innovation. Part of the GIBCA Group, the company's core business is the manufacture of aluminium, steel and composite panel cladding for roofs and facades. These panels are the product of many years' research and development and a number are exclusive to Arabian Profile (APL).



However, APL is not simply a manufacturer of cladding for the construction industry. The company also provides total design solutions and is often sought out by contractors facing unexpected or difficult architectural challenges.

Based in Sharjah since its inception, the company's products are used in a wide range of applications throughout the globe. From power plants in Vietnam to off-shore platforms in Norway – from Hong Kong to Pakistan to Africa – Arabian Profile has clients in more than twenty countries worldwide.

But first and foremost, Arabian Profile is a UAE national company, undertaking the bulk of its work in the Emirates and wider Gulf. Its cladding is seen on the region's finest shopping malls, hotels, business towers, sports stadia, private homes, palaces and mosques.

With rapid growth, a passion for innovation and commitment to excellence, the story of Arabian Profile is also the story of the UAE itself. And now, in the company's third decade, it eagerly prepares to write the next chapter.

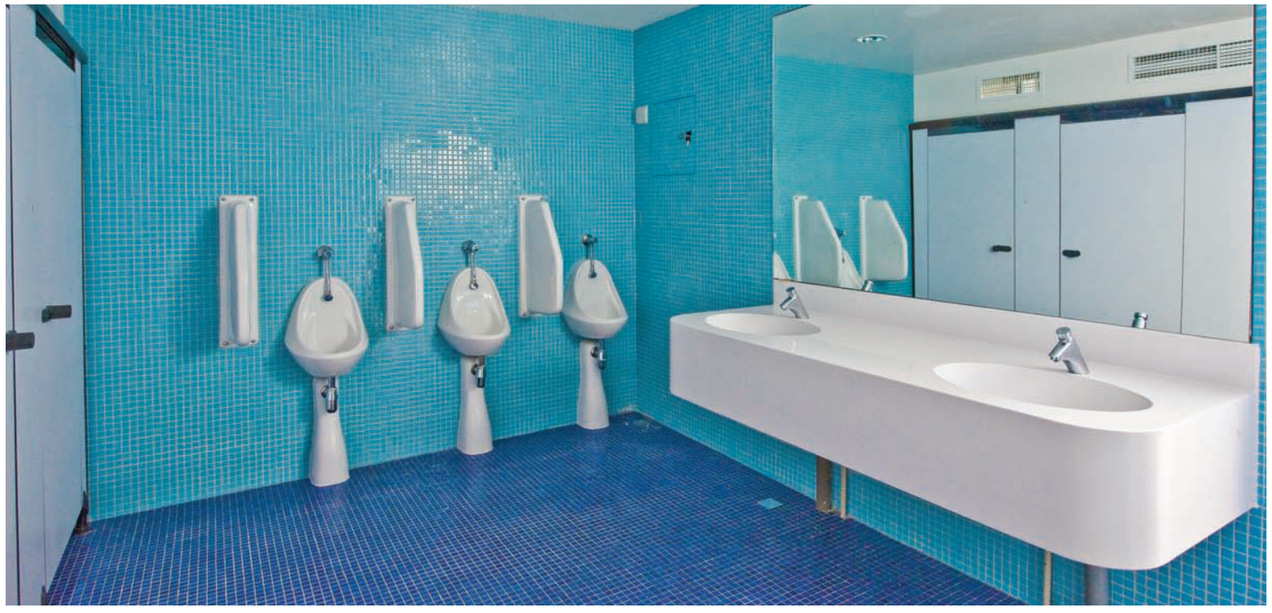
Self Contained Beach/Park Facilities Dubai

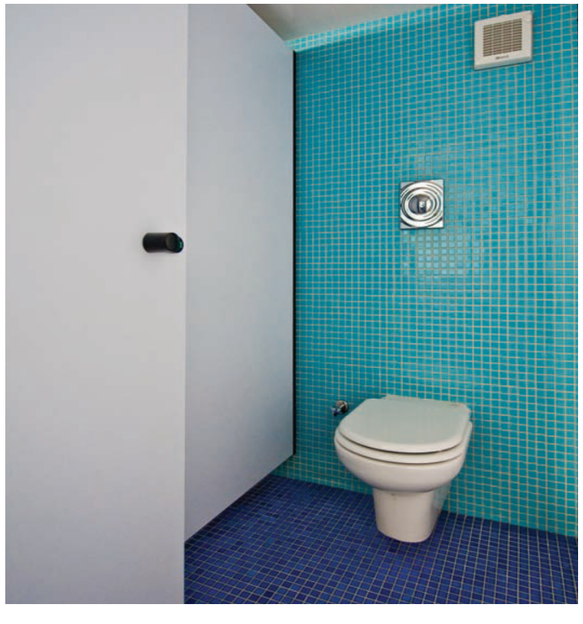
Client	Katara
Consultant	Projacs
Design	Arabian Profile Co. Ltd.
Completed	2010

Designed to provide quality facilities, the units enhance both the Beach and Park visitor experience and have already proved to be a great success.

Fully custom designed and manufactured from GRP, the APL beach and park facilities are completely self-contained and waterproof and are therefore able to be installed in wet sand/soil with high water tables.

All the unit requires is connection to electricity via a DB on the ground floor and mains water and sewage via an internal water and sewage pressure pump located in a custom designed technical room in the basement with easy access panel and full approval from Local Authorities.





The ground floor features 4 shower heads, drinking water, lockers for visitors to beaches and parks, wooden decks with non slip surfaces throughout, lighting, stylish Arabic style canopy, a general storage room and a separate storage room for caretakers.

The basement is fully air-conditioned and features separate Men and Women's facilities including WC's, urinals, vanity units. The Basement is fully tiled for easy cleaning and colour combinations can be fully customized to suite client needs.

The overall dimension of the unit is 12m long by 2.5m wide. Units come in two completely finished sections (ground level and basement level) for fast, easy installation with the two section simply bolted together.

In addition APL has also designed free standing shower systems for beach and parks and fully self-contained Mosques based on the same principle.

Where **concept** meets **construction**

Arabian Profile (APL) is a pioneering, global leader in the Cladding Fabrication Industry and has an enviable reputation for bridging the gap between concept and construction.

The world of construction is always evolving and APL constantly strives to anticipate the fast-changing needs of the marketplace. APL's experience and bespoke design philosophy enables customised solutions to those clients pushing the boundaries of architectural design and technology.

Research and development is key and APL's use of the latest composite materials has led to development of lighter, more efficient cladding solutions. These exciting new products offer endless possibilities of shape, form and function and have been used on many of the worlds most iconic buildings.

Excellence in quality, innovation and craftsmanship are the foundation of APL's continued success and will remain its core values in pushing the architectural envelope.
